A Record of Deaths. #12,813  
Shaker Museum  
Old Chatham, NY

Condition on Receipt: The quarter leather and decorated paper binding was extremely worn and abraded. The leather was broken along the joints, and the boards were nearly detached. The sewing was broken in places, and several of the pages were detached. The pages were extremely torn, discolored, acidic, weak and brittle, and could not be handled without breaking.

Treatment: The pH was recorded before and after treatment. It was 3.5 before and 8.5 after. The volume was collated and disbound. The inks were tested for solubility. The head, tail and pages were dry cleaned and nonaqueously buffered (deacidified) with methoxy magnesium methyl carbonate solution. Tears were mended where necessary with Japanese paper and rice starch paste. The volume was post bound in full cloth. A leather label was stamped in gold foil.
