Mr Valentine,

Dear Friend  
You may please send  
me 100 lbs of Frostwort  
if it is nice, and if  
not-so nice send me  
50 lbs. Your Crop of last-  
Year was fine, and I  
will send the money  
as soon as the Herb is  
delivered.

Yours Truly,

Gas J. Paulick

# SOME FACTS.

Ten years steady experimenting and thousands of dollars spent in procuring the most marvelously perfect preparation of this drug, combined with Juniper Berries.

During these ten years this great remedy has been tried upon thousands of patients suffering from all forms of *obstinate* and *complicated* urinary diseases and was improved again and again, according to the necessities of each case.

## THERE IS NO REMEDY LIKE IT IN THE WORLD TO-DAY.

It cures *Bright's Disease* and *Diabetes*, if not too far advanced, *Cystitis*, (or Inflammation of the Bladder), *Enlargement* and *Inflammation of the Prostate Gland*, *Gravel*, *Sand*, *Sediments* and *Deposits*, *Prostatitis*, *Prostatorrhoea*, and all forms of *Sexual Disease*, due to or dependent on *Urinary Irritations*. *Gleet* is cured and *Stricture* marvelously benefited by it. Catarrhal Inflammations of the Bladder, Ureters and Urethra are quickly relieved by it, frequency of urination is rendered less so, getting up in the night is stopped, foul odors, thick deposits, painful urination and its malarial symptoms due to the absorption of urinary poisons and septic matters quickly yield to **KANE'S BUCHU**. Uric Acid, Phosphatic and Oxalate of Lime deposits, so prone to form Stone in the Kidneys and Bladder, melt away before it.

It is a sovereign remedy for either children or adults who cannot retain their urine.

*It is pleasant to take*, agreeing perfectly with the most fastidious stomach.

**One Large 12-oz. Bottle, \$1.00.**

FOR SALE BY ALL DRUGGISTS.

**CAUTION.**—There are a hundred different preparations of Buchu, all possessing more or less virtues—for Buchu is good in any form. There is, however, but one **Kane's Buchu**, which, in care in selecting the leaves, peculiar methods of extraction, that yields the very last active grain in the drug, is equalled by no other.

It is the strongest and most *curative* Buchu in the world to-day and it behooves every purchaser to be sure that the bottle he gets bears Dr. Kane's likeness and Dr. Kane's signature.

**REMEMBER:**—That this remedy was tried for many years on over ten thousand cases before it was put on the market.

I have been a Specialist in Diseases of the Urinary Organs for twenty-five years. I am familiar with and have used every drug, herb and mineral that has ever been used in these diseases. I know their properties and their peculiarities as a child knows its alphabet. I know under what conditions and upon what constitutions they act best.

And all this special knowledge, experience, study and experiment has taught me that there is no single remedy, indeed no combination of remedies however cleverly compounded, that compares with **BUCHU**.

And my experience is the experience of others, not only here, but in France, Germany and England. All our scientific research, all our experiments upon men and animals, all our increased knowledge of therapeutics and botany has simply yielded us nothing more startling than the fact that in **BUCHU** we have the one and only great specific for Kidney, Bladder, Prostatic and Urethral Diseases.

I have been asked many times by my fellow physicians why I am so uniformly successful in curing urinary difficulties after other and more eminent practitioners have failed. I can only answer **BUCHU**. If I could not have this sovereign remedy to rely upon I would retire from practice or choose another specialty.

Having, several years ago, arrived positively at the conclusion that **BUCHU**, the knowledge of which came to us from the ignorant Hottentots, was the specific of all specifics in Bladder, Kidney and Prostatic Diseases, I set about determining the best method of using it and more particularly the best method of extracting its virtues from the crude leaf.

I am no mean chemist and botanist myself, but I must confess that while I succeeded, month by month and year by year in improving my extracts, I could by no means reach perfection. Knowing that I had reached my limitations I sought aid from several of the most eminent chemists in France and Germany and to the latter I owe the knowledge of a process of distillation, percolation and combination that has given me every virtue that **BUCHU** possesses and which has enabled me to cure Urinary Diseases of the most diverse, obstinate and serious nature that others could not cure.

To this preparation I gave the name, **KANE'S BUCHU** that is now so well known in every part of the world and which to the ordinary Tinctures and Extracts of **BUCHU** is like the keen damascus blade, to the untempered and rough bar of unworked metal.

This preparation I have been using constantly in my practice and I can safely say that there is no medicine like it. It is not a "cure-all," it has one distinct and specific action and that is upon the *Urinary Organs*. It heals, it soothes, it tones, it stops catarrh and suppuration, it restores natural function. It does the work of ten ordinary remedies and does it with a swiftness and a certainty that is marvelous.

### PLEASANT BUCHU.

An honest man with brutal manners is no more honest than one who is polite and polished. A nauseous drug sometimes defeats its own ends and in these days of advanced chemistry there is no need of anything being nasty or nauseous.

**KANE'S BUCHU** is pleasant to take and pleasant to look upon. Not that children cry for it, but the man or woman who has once been in the torment of pain and unrest caused by an inflamed Bladder or aching Kidneys that make the softest bed and the most comfortable chair a very Hell of unrest and torture and who has found peace, quiet and perfect rest and relief from **KANE'S BUCHU**, will swear by it and will never be without it.

There is not a city town or hamlet in this country where **KANE'S BUCHU** has not at least one friend, one heart that swells with gratitude towards it and thanks the Almighty for having given us an herb that like a magic fairy wand, has the power to banish pain and suffering.

*Dr. H. H. Kane*

# The Kidneys, Bladder, Prostate Gland and the Urine.

## SOME SIMPLE FACTS, SIMPLY TOLD.

The Urinary Organs, starting from above are composed, in the order of their enumeration, of the two Kidneys where the urine is separated from the blood, two tubes (ureters) that run from the Kidneys to the Bladder. The Bladder, a hollow, muscular organ, lined with mucous membrane that holds from 8 to 20 ounces and serves for a receptacle for the urine. The Prostate Gland (in men) a solid muscular body, filled with thousands of minute ducts, that serves as a buffer at the neck of the Bladder. In health it is of about the size of a horse-chestnut, has two lateral (side) lobes and in disease, three—a middle one that often obstructs or entirely prevents the outflow of urine. This occurs most often in men past 40.

The urethra, a single tube of a certain fixed calibre, that conveys the urine to the outside world.

The Kidneys are the SEWERS of the body, carrying off all poisons and impurities *that are soluble in water*. The pores of the skin remove the oily refuse and the bowels the solid or semi-solid refuse.

Stoppage or partial action of the Kidney function is the most dangerous of all. Rapid poisoning, and convulsions or stupor and death often result. Partial action leads to slow poisoning such as is seen in Bright's Disease. Finally the Kidneys cannot even remove the water from the blood and dropsy results.

A healthy person urinates from 4 to 6 times in 24 hours.

Forty ounces is the average daily quantity.

The average reaction is acid.

The average Specific Gravity is 1.020.

Color, a pale amber.

There is *never* any sediment in a healthy urine.

Put your urine into a clean bottle, set it on a window sill, let it stand and if after 12 hours you find any sediment or deposit in the bottom, give the matter your *immediate* attention. Nowhere are delays so dangerous as in urinary diseases. Thousands of lives might be saved and Bright's Disease be averted or aborted by early attention and a few doses of a good remedy like **KANE'S BUCHU**.

Red, sandy deposits in the urine are usually uric acid or the urates. *Indications*: Rheumatism, Gravel or Stone in the Bladder or Kidneys.

White, chalky deposits are usually phosphatic. *Indications*: Nervous affections, paralysis, brain softening, phosphatic stone or gravel.

The urine of Cystitis (Inflammation of the Bladder) and Enlarged Prostate is usually a sickly, pale, milky color, sometimes whitish with a tinge of green, sometimes stained with blood and having either a heavy *mealy* or a thick ropy mucous deposit in the bottom of the bottle or vessels.

**THE AMERICAN BUCHU COMPANY** has in its employ specially qualified chemists whose sole duty it is to test, free of charge, any sample of urine, left at its offices, or sent by express prepaid. The bottle must be carefully packed and bear the patients name and address. The urine should never be more than six hours old before being sent, if from a distance.

Mr  
Respected Friend

Will you please collect  
the Boxes I pay for all Garden Seeds sold  
from Boxes of Shaker Garden Seed Co  
that you put out last March at the  
different stores in your town, I send  
you the receipts of same, be carefull  
not to send to Co any seed that belongs  
to other firms, Now be sure I take  
pay for all expence, I send Balance  
to Shaker Seed Co, by Check or Money Order  
pleas be sure tie with strong Cord I  
ship as Card direct,

P.O. Money Order at Mt Lebanon Pa

Yours very truly  
Shaker Seed Co
