**INSIST ON GENUINE
INTERNATIONAL HARVESTER
PARTS AND SERVICE
FOR YOUR INTERNATIONAL TRUCKS
TRACTORS AND EQUIPMENT**

No other factor has contributed so much to the ever-increasing demand for International Equipment as the aftersale service offered by the International Harvester Organization and its dealers. This service, available through a large number of fully-equipped company-owned branches, service stations, and dealers, is one of the outstanding reasons for the trend toward standardization on International Harvester Equipment.

International owners depend on International Harvester branches and dealers for genuine International parts. Adequate stocks of replacement parts are carried at all branches and by well-equipped International dealers everywhere. This service contributes materially to low-cost operation.

Parts for any International machine can be supplied promptly—there are no orphans in the International line. Trucks and tractors ten and even fifteen years old brought to our service stations are economically repaired with genuine International parts. Each International service station is the result of continuous study to bring about improvements that will result in faster, more efficient workmanship and savings of time and money for International owners. There is only one certain and infallible way to secure genuine International repair parts and service—that is from International branches and dealers.

**Your International Harvester Equipment is 100%
When You Buy It. Keep It 100% By Insisting
On Genuine International Parts and Service.**
