ICHTHYOL

[Ammonium Sulpho-ichthyolate ICHTHYOL COMPANY]

Manufactured by the Ichthyol Co., Hamburg

Merck & Co.

Sole Agents for U. S.

New York.

[Trade-mark.—U. S. Patents, May 20, '85; Jan. 23, '93]

REMINDER.—Ichthyol is soluble in water or in a mixture of equal parts alcohol and ether; partially in pure alcohol or ether; freely miscible with glycerin or oils.—**INCOMPATIBLES:** Acids precipitate a dark mass; alkali hydrates or carbonates decompose it; with alkaloids or their salts, insoluble compounds of sulpho-ichthyolic acid are formed. Ichthyol and iodine should not be used together in ointments. For **DEODORIZING** Ichthyol the addition of 1 part each Oil Bergamot and Oil Eucalyptus, to 50 parts Ichthyol, has been recommended.—Before applying Ichthyol, it is advisable, except in eczema, to wash the parts each time with warm water and soap. After inunction or painting, the parts are best covered with cotton-wool or flannel and gutta-percha tissue.—Ichthyol **STAINS** on fabrics disappear on washing.—Dose: 3 to 15 min. in pills, capsules or peppermint water. Externally applied of any strength.

 "Merck's Digest" on Ichthyol, containing Clinical Reports and Formulary, mailed to Physicians or Pharmacists on request to MERCK & CO., New York.

SOLD BY ALL DRUGGISTS.
TRADE **ENTONA** MARK

THE ORIGINAL
GLUTEN SUPPOSITORIES.

Manufactured by Health Food Co., 61 Fifth Ave., S. E. cor. 13th St., New York.

This union of **White Wheat Gluten** and vegetable oils is designed to overcome the tendency to intestinal inactivity, which is so widely prevalent in America, and upon which so many painful and dangerous diseases depend. The philosophy of their curative effects is simple and interesting. The good results which have attended their use is clearly attributable to the **increased nutrition of the parts**. Being fed directly by the vital nutrient, **Gluten**, the nerve-ganglia involved manifest new life, and the starved tissues acknowledge the added vigor which comes only through appropriate nutriment. The knowledge that the vital forces may be sustained for a considerable period by the absorption of gluten through any mucous surface, has induced the belief that local torpor or semi-paralysis dependent upon an anæmic condition of the nerve-tissues of the rectal region, could be overcome by its use; and no disappointment has attended the practical application of the theory. Not only has long-standing constipation been quickly relieved, and the tendency to it finally overcome, but, coincidentally, serious and painful hemorrhoidal affections have disappeared. The conclusion is therefore reached that, in all cases of great and persistent inactivity of the rectal region, the **Entona Gluten Suppositories** will prove a valuable adjunct to our soluble and highly nourishing foods. With this effective local application, together with the **Fruit Food**, the **Whole Wheat Gluten** as a bread or mush food, and the **Brain Food Crackers**, the necessity for employing laxatives, cathartics, and enemas would seem to be entirely obviated.

The greatest of physical ills in America is digestive torpor, or semi-paralysis, originally induced by a kind of starvation of the intestinal nerve-ganglia. One of its most prevalent forms is constipation. The tendency to it runs in families, and descends from generation to generation. Attendant upon it are the distressing concomitants of anal irritations and fissures, and hemorrhoidal engorgements. From all these evils, even infants suffer, and for them, as for all, relief is sought in purgation. The evil is always perpetuated by cathartics. It can only be overcome and its tendency eradicated by increasing vital power through appropriate food measures, among which the use of the **Entona Gluten Suppositories** proves of the first importance. The application of this vital substance to the absorbent mucous surface, supplemented by genuine foods, results in increased nutrition of the torpid organs, and their gradual but sure restoration to normal activity.

A CURE FOR CONSTIPATION.

Until the discovery of the efficacy of the vegetable albuminoid—Gluten—as a local nutrient and stimulant to inactive and semi-paralyzed motor nerves, relief from constipation was always sought from cathartics or laxatives, and enemas. By neither of these methods is constipation permanently cured. Cathartics and laxatives are recognized as enemies to be expelled, and in their expulsion they are accompanied by whatever the bowels contain, and not infrequently by the contents of the stomach also. They lessen nutrition and inevitably enfeeble. Once used they must be used again in stronger form, and so on endlessly. To employ them habitually is simply dreadful. Injections never cure. The great objection to the enema is, that its use once entered upon, must be continued for life, while proving less and less valuable with each passing day. The power of the rectal muscles to expel is lessened in proportion as the necessity for expulsive effort is withdrawn, until at last complete inaction and paralysis supervene.

In all cases of constipation, we direct that enemas, cathartics, laxatives, "loosening foods" so called, mineral waters, etc., shall be utterly and forever abandoned. We **Feed** the rectal nerves by the direct application of the soluble **Gluten** in the **Entona Gluten Suppositories**, and find that normal vigor soon asserts itself. For babies they are perfection. In fact, the younger the patient or the shorter the period of constipation, the more speedy is the cure.

Dr. A. W. THOMPSON, Northampton, Mass., says: "I have tested the **Entona Gluten Suppositories** and consider them valuable, as, indeed, I expected from the excellence of their theory."

Dr. WM. TOD HELMUTH declares the **Entona Gluten Suppositories** to be "the best remedy for constipation which I have ever prescribed."

"As Sancho Panza said of sleep, so say I of your **Entona Gluten Suppositories**: God bless the man who invented them!"—E. L. RIPLEY, Burlington, Vt.

"The use of **Entona Gluten Suppositories**, made by Health Food Co., 61 Fifth Avenue, New York, has relieved my constipation, and their **Gluten** and **Brain Food** have secured for me new powers of digestion, and the ability to sleep soundly and think clearly. I believe their food-remedies to be worthy of the high praise which they are receiving on all sides."—REV. JOHN H. PATON, Mich.

"I cannot speak too highly of the Health Food Company's **Entona Gluten Suppositories**, as they have been a perfect God-send to me. I have suffered from constipation and hemorrhoids more than twenty years, and have at last found substantial relief through the use of the **Entona Gluten Suppositories**."—CYRUS BRADBURY, Hopedale, Mass.
